

## PERSONAL, SOCIAL AND HEALTH EDUCATION

In our school we feel that the development of the personal and social qualities of the children, such as independence, collaboration, co-operation and self confidence, are essential if they are to develop not only as learners but also as members of society. We consciously plan to enhance children's self esteem, to give them responsibility and to encourage respect for other people, their beliefs and ideas.

Above all, we strive to create a school where everyone feels respected, safe and happy enabling each child to feel secure enough to respect the feelings of others and behave well
